

Conference Aims

Overall

- Educate leaders of the global youth activist community on climate restoration and carbon dioxide removal, through a series of group discussions with experts over the experts ideas
- Give the activists an opportunity to formulate and present their ideas
- Connect top global youth activists with experts and political figures

By group attending

Activists

- Educate top global activists on climate restoration and carbon dioxide removal and the positives and negatives of both
- Give activists an opportunity to discuss these concepts in small groups with experts, and question the experts on their ideas
- Activists to formulate their own views on climate restoration and carbon dioxide removal
- Give the activists an opportunity to present their ideas to figures of prominence
- Give the activists an opportunity to connect to other activists from across the world as well as experts in the field

Experts

- Present their ideas in small groups to top global activists, and give the activists an opportunity to probe their ideas
- Connect to top global youth climate activists
- Opportunity to educate some of the most important young people in the global climate discussion

Political Figures

- Hear the concerns and ideas of some of the world's top youth activists
